

BARTLETT & WEST

SERVICE. THE BARTLETT & WEST WAY.

What Bartlett & West Is All About

At Bartlett & West, we take a more rounded view in creating value for our clients. With a portfolio of professional solutions—from engineering to landscape architecture, from GIS to information management, from field services to sustainable development—our people bring a total perspective to our clients' challenges.

Everyone at Bartlett & West is committed to giving our clients world-class service. We know what our clients want. We asked them. They're looking for clear understanding of their needs. They value accessibility and responsiveness, integrity, quality and proactive communication from their professional services partners. These are values our people practice every day. For each employee, this is Service. The Bartlett & West Way.

Our Purpose

At Bartlett & West we take our purpose seriously: To lead our communities to a better tomorrow.

Our Values

Earning Trust—through doing what is right even when doing so is difficult.

Doing what we do best at Bartlett & West means building strong, lasting relationships with our clients and our employees.

Each of these relationships starts with a common level of trust, and we build from there by being accessible and responsive, making sure we understand employee and client needs, being proactive in our communications, and showing integrity in all that we do.

Delivering Quality—through pride in our work and an attitude of continuous improvement.

Bartlett & West employees take their professions seriously. We are committed to quality. Peer reviews keep projects on track and avoid delays, while professional development helps us do our jobs better. Bartlett & West University provides a curriculum that drives continuous improvement, helping our people reach their full potential.

Serving Others—through caring for our clients, our community, and each other.

Serving others means different things to different people. To some it's making a donation to a local charity and to others it's taking time out of an already hectic schedule to volunteer in their community. However our employees choose to serve individually, Bartlett & West supports those interests as a corporation. Our firm is driven to make a difference in the communities where we live and work.

What Bartlett & West Is All About

For 60 years the success of our firm has been founded on one simple fact: repeat business. We create value for our clients through a portfolio of professional services, including engineering, field services, landscape architecture and data management. To do that, our people focus on understanding clients' needs, accessibility and responsiveness, integrity, quality and proactive communication. We've built our business on these values. These are more than just words to us. For every employee, this is **Service. The Bartlett & West Way.**

Our firm is an employee-owned company that has grown steadily from a small two-person partnership in 1951 into a multi-disciplined firm of nearly 300 individuals. A rich mix of professional, technical, administrative and support staff provides professional engineering and related services to governmental agencies, municipalities, private industry and individual clients throughout the central United States. Year after year, Bartlett & West is ranked among the top design firms by industry trade publication *Engineering News-Record*.

Bartlett & West is organized to provide efficient, cost-effective services to our client groups, including Public Works, Rural & Regional Water, Architectural Engineering, Field Services, Land Development, GeoInfo, and Transportation.

Sustainability—In 2007, Bartlett & West initiated an internal task force that studied the importance of sustainability and efficiency in design and developed a three-phase implementation program. This resulted in improved facilities and responsible policies internally. This approach to providing for our future is also employed in our external pursuits. When appropriate, alternative, sustainable solutions are presented to clients throughout the design and construction phases of our projects.

Currently Bartlett & West has 13 LEED AP certified professionals on staff representing various engineering and landscape architecture disciplines.

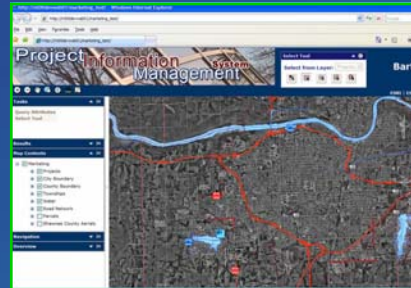

Our clients access the full range of Bartlett & West services through any of our ten offices in six states. Each office is empowered to bring the full complement of our resources to bear on our customers' challenges. You'll find Bartlett & West offices in Topeka, Lawrence and Manhattan, KS, St. Joseph, Jefferson City and Lee's Summit, MO, Bismarck, ND, Fort Worth, TX, Sioux Falls, SD and Des Moines, IA.

Service. The Bartlett & West Way.

Bartlett & West brings a holistic approach to our clients' challenges with a full portfolio of efficient, cost-effective solutions.

GIS and Information Management

- Geographic Information Systems (GIS) needs assessment, development and implementation
- Web hosting
- Application development
- Map, data and document integration
- Map plotting and production
- Document imaging
- Data loading and reconciliation

Land Development

- Land use planning
- Platting
- Zoning and permitting
- Feasibility studies
- Drainage studies
- Site plans
- Grading design
- Utilities design and coordination
- Traffic Impact Analysis
- Construction administration
- LEED Accredited Professionals

Landscape Architecture

- Land use master planning
- Parks, trails, athletic facilities, pathways
- Environmentally sensitive design
- Streetscapes
- Healing gardens
- Planting selection and design
- Irrigation design
- 3-D color renderings and animation
- LEED Accredited Professionals
- Public information programs

Mechanical, Electrical & Plumbing Design

- Plumbing design: waste, vent, water compressed air piping
- HVAC design
- Lighting design: building, roadway, parking lot, landscape lighting
- Power distribution design
- Emergency power generation
- Uninterrupted power systems
- Utility power design
- LEED Accredited Professionals

Stormwater Management

- Watershed studies
- Drainage design
- Hydraulic and hydrologic modeling
- Flood control
- Channel stabilization
- Environmentally sensitive solutions
- LEED Accredited Professionals

Structural Engineering

- Structural investigations and reports
- Commercial, industrial and residential design
- Specialty structures
- Historical renovations
- Concrete, steel, wood, and aluminum structures

Survey and Construction Observation

- Surveys
- Geographic Information Systems (GIS) services
- Global Positioning System (GPS) services
- Platting
- Construction staking
- Field construction observation and coordination
- Materials testing
- Construction administration
- Utilities coordination
- Certification programs
- Construction quality control services

Sustainable Design

- LEED Accredited Professionals
- Livable communities planning
- Lifecycle analysis
- Energy-efficient design
- Green infrastructure design
- Sustainability reporting
- Public information programs

Transportation

- Corridor studies
- Road and highway design
- Interchanges and roundabouts
- Lighting
- Traffic signal improvements
- Stormwater management
- Bridge structural analysis and design
- Hydraulic and hydrologic modeling
- Traffic control analysis
- Right-of-way and legal descriptions
- Landscape architectural design and erosion control
- Pedestrian and bicycle path design
- Construction sequencing
- Public information programs

Water Supply, Treatment and Distribution

- Municipal, regional, rural and wholesale systems
- Preliminary, feasibility, and design reports
- Rate analysis, studies, and reports
- Short- and long-range system planning
- Regulatory compliance strategies and planning
- Public information and funding application aid
- Water source—well, intake, purchase contracts
- Water treatment design and operational analysis
- System analysis, design, and modeling including piping, pump stations, controls, and storage
- Construction phase engineering services
- Federal, state and local permitting
- Geographic Information Systems (GIS) and Global Positioning System (GPS) data

Wastewater Collection and Treatment

- Wastewater studies
- System planning
- Facilities design
- Sewers and pump stations
- Treatment plants
- Residuals management
- Regulatory compliance strategies
- Permitting
- Public information programs

Where to find us.
